Inferences

1. **Economic Prosperity (GDP per Capita):**

The average GDP per capita for the top 10 happiest countries is **1.53**, significantly higher than the bottom 10 countries, which average only **0.44**.

This highlights that wealthier countries tend to score higher in happiness, suggesting a strong correlation between economic prosperity and overall happiness levels.

2. **Freedom and Social Support:**

The top 10 countries have markedly higher levels of **freedom to make life choices (0.68)** compared to the bottom 10 (**0.09**).

Similarly, **social support** is significantly greater in happier countries (**1.41**) versus less happy countries (**0.27**).

This indicates that societal structures providing personal autonomy and strong social connections play critical roles in happiness.

3. **Healthy Life Expectancy:**

The **healthy life expectancy** in the happiest countries averages **0.84**, compared to only **0.21** in the least happy ones.

Longer and healthier lives are closely associated with higher happiness, reflecting the importance of access to healthcare and overall well-being.
